Emerson & Cuming Microwave Products Unveils New Global Web Site

Randolph, MA – May 15, 2007-- Emerson & Cuming Microwave Products today announced the launch of its new corporate Web site, <http://www.eccosorb.com>, that features enhanced navigation, new functionality and upgraded technical content for customers and sales partners worldwide.

Built with dynamically driven quick links, the new site allows users to quickly and easily navigate and gain access to needed information. The navigation and layout of the site also allows visitors to access more information from a single page than the previous site, increasing usability and content accessibility.

The new global website also features a wide array of products, technical resources and services. Some significant enhancements include: an interactive product selector guide that walks customers through the process of getting a starting recommendation for an application to meet the desired requirements and specifications; a glossary of terms; and a user-centric e-commerce solution with simple checkout. Additionally, the site features more detailed industry specific application information and success stories. Other references on the site include, technical notes, tools for engineers, specific global location listings and a news center.

According to Mike Plante, Director of Sales and Marketing, *“Our goal was to create a single, comprehensive resource for our customers worldwide. With our new redesign, the site integrates three regional based websites (US, Europe, and Asia-Pacific) into one corporate website, providing user-friendly resources for world wide customers who quickly need product information that is localized to fit their regional business needs.”*

Emerson & Cuming Microwave Products, Inc., an ISO 9001:2000 company is a world leader in the development and manufacturer of ECCOSORB[®], microwave absorbing materials and anechoic chambers; ECCOSTOCK[®] dielectric materials for low loss RF and microwave applications; ECCOSHIELD[®] electrically conductive sheets, caulks, adhesives and coatings; and ECCOPAD[®], Smart tag isolators, for read on metal technology. Emerson & Cuming Microwave Products, maintains manufacturing facilities in Randolph, Massachusetts (US) and Westerlo, Belgium.

For over 50 years, the company has produced leading edge materials and engineered solutions for the wireless and satellite communications, military and aerospace, automotive, RFID and medical markets. For additional information, contact the company in North America at Tel: 1-800-650-5740 or 781-961-9600; in Europe at Tel: +32-(0) 14-56 25 00; or point internet browsers to www.eccosorb.com.
